

GAYATRI KURITI

Aspiring Software Developer

Aspiring Software Developer skilled in C, Python, and SQL with internship experience in Cybersecurity and AI/ML. Passionate about problem-solving and eager to contribute to a dynamic, growth-oriented organization.

EDUCATION

Bachelor of Technology

Lendi Institute of Engineering and Technology

01/2021 - 01/2025

Intermediate

Vidwan Junior College, Board of Intermediate Education

01/2019 - 01/2021

Secondary Education (SSC)

Sri Sai Nikethan High School

01/2018 - 01/2019

INTERNSHIPS

Cyber Security Intern

Palo Alto Networks (AICTE)

Completed a Cyber Security internship focused on network security, threat detection, and vulnerability management. Gained hands-on experience with firewall configurations, intrusion detection systems, and security monitoring techniques. Developed an understanding of identifying cyber threats, mitigating security risks, and implementing cybersecurity best practices to protect organizational systems and data.

Artificial Intelligence & Machine Learning Intern

AICTE

Completed an internship focused on Artificial Intelligence and Machine Learning, gaining hands-on experience with machine learning algorithms and their practical applications. Worked on data preprocessing, model development, and predictive analysis using sample datasets. Enhanced understanding of pattern recognition, automation, and data-driven decision-making through the implementation and evaluation of ML models.

SKILLS

C

Python

SQL (Basics – storage, retrieval, queries)

IoT Concepts

AI/ML Fundamentals

ACADEMIC PROJECTS

Power Distribution Through Renewable Sources

- Developed a model to optimize power distribution using renewable energy sources, focusing on improving efficiency and sustainability. Collaborated with a team of four to analyze energy demand and resource availability for effective power allocation. Gained practical experience in renewable energy systems, power management, and sustainable energy distribution strategies.

E-Waste Facility Locator

- Developed a location-based system to help users identify the nearest authorized e-waste collection and recycling centers. Contributed to algorithm optimization to improve search accuracy and system efficiency while enhancing user interaction logic for a seamless experience. Strengthened skills in application development, problem-solving, and sustainable technology solutions through real-world project implementation.
